

## Case Study

### Light Regional Council Kapunda Main Street

#### Project Details

**Client name**

Light Regional Council

**Start date**

September 2018

**Completion date**

October 2018

**Contract Type**

Public Lighting Construction

**Key Personnel**

Operations Manager Public Lighting -  
Cheong Doherty  
Public Lighting Construction supervisor  
- Mark Dougray  
Public Lighting Design Officer - Graham  
Berryman

**The team at Enerven  
ensured the character &  
ambiance of the main street  
precinct was retained.**

#### The Customer

The Light Regional Council borders the famed Barossa Valley, the Town of Gawler and is located to the north of the greater metropolitan area of Adelaide. The region enjoys the benefits normally associated with the Barossa Valley together with the richness in mining heritage and premier farming country.

Encompassing the townships of Kapunda, Freeling, Greenock, Roseworthy and Wasleys, and the suburb of Hewett, the Light Regional Council is a progressive, growth, regional Council. It takes in a diverse and thriving area of broad acre farming, viticultural areas and appealing rural-urban living options.

The Council continues to attract important viticultural and agricultural development to the area, along with associated support industries. Significant industrial growth contributes to creating additional opportunities for employment and economic development in the area.

#### The Opportunity

Light Regional Council was looking to upgrade their lighting through out the Town Centre precinct in Kapunda. Having vast experience in similar LED street lighting roll-out projects, Enerven was invited, by the Council's contractor, to tender for the Main Street Lighting Upgrade project.

#### The Solution

Enerven Public Lighting group replaced the existing (x15) existing colonial style post top luminaires, which were utilising old discharge lighting technology, with 155W energy efficient LED fittings. The new energy efficient luminaires still retained the old colonial style of the fittings they replaced. This ensured the character & ambiance of the main street precinct was retained.

#### Key Capabilities

This project highlights Enerven's ability to deliver quality and innovative design and construction capabilities within a tight delivery schedule. Enerven is able to call upon a upon a reliable and multi-skilled workforce including Electrical & Powerline Trade Skill Workers.

## Why Enerven?

Our experience in the market place, combined with the expertise and industry knowledge of our team, makes Enerven's offering second to none - which is why industry leaders such as Oz Minerals, Lendlease, AGL and BHP Billiton trust Enerven with their energy infrastructure assets.

We invest heavily in the best equipment and the professional development of our staff, which means we combine experience and history with innovation and technology to deliver solutions that address the evolving energy distribution requirements of the community.

With a strong supplier and partner network behind us, our highly skilled staff work closely with you to fully understand your specific needs and vision, and will tailor a solution to suit.

Delivering the highest standard of work in a safe and environmentally sustainable manner is our top priority, and we have an outstanding track record to prove it. We focus on building long-term relationships with our clients, we're committed to working with you for the lifecycle of your project and beyond.

## Who We Are

**Enerven, an SA Power Networks Company, provides a range of construction and maintenance services, including fibre installation, to clients both within SA and nationally. We believe innovations and technology will continue to drive efficiencies, but no more so than the experience, knowledge and capabilities of our people.**
