

Commercial & Industrial Solar & Storage

Enerven is experienced in making the process of sourcing power from the sun easy. We have a strong track record delivering solar and energy storage solutions for businesses such as sporting venues, large manufacturing operations and utility scale customers.

We have access to a significant resource pool, covering all disciplines required for complex technical projects.

This means our dedicated team has the skills and experience to devise and deliver the solution you need, rather than providing standard packages available in the market.

Our strong supplier networks enable us to bring experienced, pre-qualified service providers on-board quickly, resulting in a project delivery that is smooth, efficient and safe – and in-line with Enerven's stringent quality and safety standards.

Enerven's Solar & Storage Division provides turnkey solutions to customers who are looking to reduce their energy costs, future proof their business or add green credentials to their organisation's corporate image through the design and installation of solar and storage. Our services include designing and constructing roof top solar PV, standalone storage applications, microgrids and solar farms.

Our focus is to develop the best solution for each business' individual need; dedicating time to analysing our customer's unique situation, market environment and energy habits - both current and expected - and then build a tailor-made solar and/or storage energy system.

We provide an end-to-end solution for our clients, from initial advisory and design through to construction, connection and maintenance. Our industry knowledge, combined with our problem-solving capabilities and experience allow us to consistently deliver to our customer's expectations.

Our Capabilities

As energy solutions specialists, the team at Enerven has the capabilities to develop solar and storage solutions that provide the most efficient, reliable and cost-effective energy supply for each client. This includes all elements of design, engineering, procurement, construction, maintenance and operation.

We provide a turnkey solution and work closely with you to bring your project to life, whether it's individual elements or a complete package.

Our Services

Design and construction of:

- Roof-top solar PV systems
- Ground mount solar farms
- Floating solar PV systems
- Energy storage systems (battery and flywheel)
- Power Factor Correction
- High voltage works (if applicable)

Facilitation and management of:

- Network connection agreements
- Asset maintenance and cleaning
- Asset data collection, monitoring and reporting
- Energy Auditing
- PPAs (Purchase Power Agreements)

Why Enerven?

We develop solutions with customers and communities to enable them to choose, create and adapt how they connect with, make, store and use energy, on their terms. Enerven began as a division of SA Power Networks¹ and, over fifteen years, has grown into a market leader.

Building on the 100-year foundation, Enerven is a proven expert in the development of major infrastructure, energy and telecommunications solutions.

Proactive, Collaborative, Dependable

Our values are the DNA of our business. They embody what we stand for and focus firmly on our customers' needs to accomplish long term, sustainable improvements that are reliable, maximise profitability and minimise costs. Further to this, at Enerven, everything we do is underpinned by an unrelenting focus on safety and wellbeing.

We build our customers' vision. Our driving ambition is to connect you with tomorrow.

Who We Are

Enerven, an SA Power Networks Company, provides a range of construction and maintenance services, including fibre installation, to clients both within SA and nationally. We believe innovations and technology will continue to drive efficiencies, but no more so than the experience, knowledge and capabilities of our people.
